

RAPID RESPONSE INFECTION CONTROL

MOST RELIABLE SERVICE IN THE REGION

Cleaning is the front line defense for killing germs and viruses through Sanitation & Disinfection. If you find your school in an outbreak, call us. We can reach high-touch surfaces and hard-to-reach places, quickly and efficiently.

PREFERRED SCHOOL CLEANING SERVICE

For more than 35 years, we've been serving school districts throughout Texas and Louisiana with our customized school cleaning services. We use proven sanitation and infection control measures to eliminate indoor bacteria, molds, viruses, and allergens, helping you effectively reduce the number of sick days in your school.

PUTTING YOUR FEARS TO REST

Our EPA Approved Products Kill:

- » COVID-19 / Coronavirus
- » MRSA
- » Cold Viruses
- » Flu Viruses
- » Norovirus
- » E. Coli
- » Salmonella

REGION 7 APPROVED VENDOR

For the 10th year in a row, DNC Facility Services has been chosen as a preferred vendor by the Region 7 Purchasing Cooperative

LOOKING FOR RELIABLE SCHOOL CLEANING SERVICES?

Managing school districts comes with many cleaning challenges, especially if you don't have the right janitorial staff in place. Infection control can become a major problem if you don't have dependable professionals providing your cleaning services.

Balancing your school's sanitation needs, appearance, and budget is challenging. We make it possible for you to achieve all of your goals while making the most of your janitorial budget.

WHY WE USE ELECTROSTATIC SPRAYERS FOR EFFICIENT SCHOOL DISINFECTION

Throughout your school, hundreds of surfaces could be covered with pathogens that cause and spread illness. It's difficult to get to these surfaces to disinfect them. And the stakes couldn't be higher.

Traditional disinfecting methods offer only limited coverage. To reduce the cause of illness at its source, we use a revolutionary way to reach and kill pathogens almost everywhere.

The electrostatic sprayer system turns the liquid into small droplets. Then the sprayer applies a charge to each drop so they are attracted to and adhere to surfaces with a force greater than gravity. The coverage is superior. It spreads over, under and around surfaces.

Our electrostatic system saves you time, money and labor. We can cover up to 300 square feet in just 60 seconds. In an hour, up to 18,000 square feet, compared to only 3,900 square feet with a trigger sprayer.

OUR PROCESS FOR SCHOOL DISINFECTION

Call us at 903-560-8009

We will spray all surfaces in infected/ requested areas with EPA Approved Chemical (2-4 minute kill time).

We will respond within 2-24 hours

We will hand wipe/clean all high touch point areas if requested.

We will arrive with a dedicated Infection Control crew & specialized equipment

You will resume normal business.
